DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 3-6 & 19-22, drawn to roller surface characteristics, classified in class 242, subclass 550.
 - II. Claims 10-12 & 25-27, drawn to a drive means, classified in class 242, subclass 564.
 - III. Claims 13 & 28, drawn to shield, classified in class 242, subclass 566.
 - IV. Claims 14-15, 18, 23 & 29-30, drawn to a transfer mechanism, classified in class 242, subclass 559.
 - V. Claims 16 & 31, drawn to a cutting member, classified in class 83, subclass 436.15.
 - VI. Claims 32-34, drawn to a method of dispensing sheet material, classified in class 242, subclass 550.

Claims 1 and 17 are common to each of groups I-V. If either of claims 1 and 17 are ultimately determined to be allowable in their current form, rejoinder of claims dependent therefrom will be considered. Claims 2, 7-9, 18 & 24 will be examined with the elected invention.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown

Art Unit: 3724

to be separately usable. For example, the drive means of group II could be employed without the cutting member of group V, and conversely, the cutting member of group V could be employed without the drive means of group II. See MPEP § 806.05(d).

3. Inventions VI and I-V are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as replenishing the sheet material from the first source when it runs out and resetting the apparatus to dispense from the first roll.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas J. Druan, Jr. whose telephone number is 703-308-4200. The examiner can normally be reached on M-F (8:30-6:00) First Friday Off.
